

A large circular image showing a dynamic splash of water. A thick stream of water falls from the top, creating a large, turbulent splash with many bubbles and droplets. The water then settles into a calm pool at the bottom. The background is a light, neutral color.

WATER TREATMENT SYSTEMS

SUSTAINABLE WATER SOLUTIONS

Design

Manufacturing

Installation

▶ VISION

**The Middle East's First Choice
for Water Solutions.**

▶ MISSION

We provide High-Quality water treatment solutions to specialty businesses whose success is dependent in part upon the consistent performance of such supporting services.

**"The Quality of our products is
directly reflected in yours"**

COMPANY CAPABILITIES

Design, Manufacturing and Installation for water treatment systems.

Improving & maintaining your current water plant.

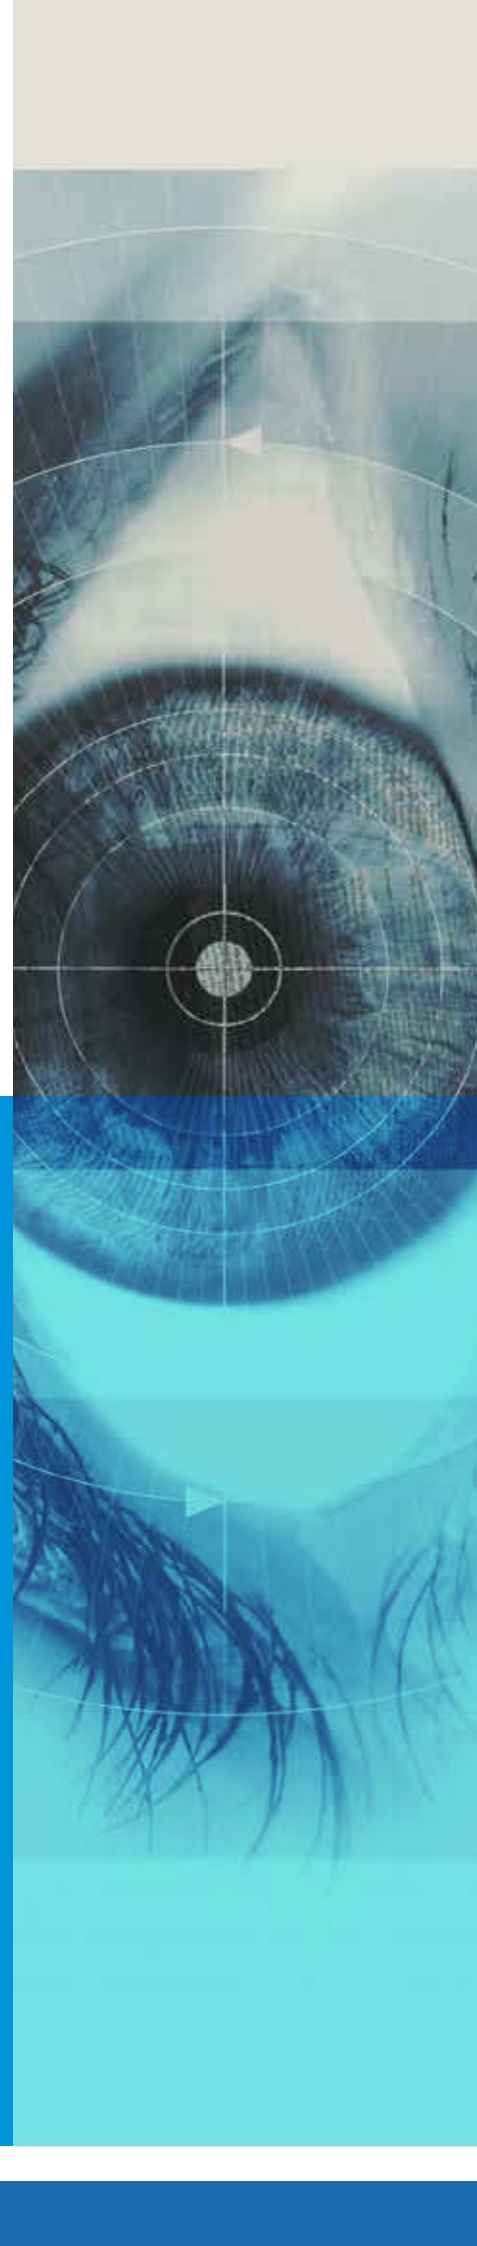

Provide you with all products and spare parts.

Maintenance team provides you with preventive (scheduled) maintenance & breakdown (emergency) maintenance.

Technical support for answering your questions and solving your problems.

EMEC:

Italian company for dosing pumps and control systems.

Aquafine:

American company for Ultraviolet systems.

Viqua:

Canadian company for Ultraviolet systems.

SUPPLIERS

Coppers: French company for automatic multiport control valves

Helamin: Swiss Company for Untraditional Chemicals

Carbon Activated Corp.
American company for activated carbon

VENTIL AQUA:

Portuguese company for waste water equipment

Pentair:

American company for valves, pressure tanks, distributors and more

Clack:

American company for control valves and filtration media.

PRODUCTS

- Solenoid driven metering pumps
- Control Instruments
- Motor driven metering pumps
- Disinfection systems
- Pulse Emitting water meters
- Probes
- UV disinfection units
- Automatic Multiport valves
- Pressure Tanks (vessels)
- Membrane pressure vessels
- RO Membranes
- Distributors
- Activated carbon
- Resin
- Chemicals

SYSTEMS

- Industrial Reverse Osmosis systems
- Waste Water Treatment systems
- Softening systems
- Filtration systems
- Iron Removal systems
- Ozone sterilization & UV disinfection systems
- Assembled Panels for (Pools, Cooling towers, boilers & more)
- Dosing, measuring and controlling systems

CLIENTS

IVTE has successfully designed and installed water treatment systems within many clients, from Blue-Chip Companies, Small and Medium Enterprises to Public Bodies across various industry sectors.

- **Some of our clients**

WHY US?

High Quality Products.

Suitable Prices.

The best after Sale Services.

Guarantee for products.

More than 25 Years of Experience.

Maintenance Announcements.

Our Partnership with global manufacturers provides you the knowledge and experiences of the water experts from different countries.

FAQ

1 Why should you use our products?

- We are very keen to provide our customers with high quality products with the latest technology by responsible price.

2 Why should you use high quality products?

- High quality products will avoid you and your business from frequent failures and breakdowns for your system, additional operational and maintenance cost, and the risk of passing contaminated water to your product.

3 How can you find out what is the suitable system for your workplace?

- We will make a free consultancy visit to your workplace; then we will make a report for your case with advice for the suitable system/product.
